*SALUTE, MY NAME IS*

# *<Mekdelawit Andualem/>*

I’m Mekdelawit Andualem, a third-year software engineering student at Addis Ababa University. I’m diving head-first into the tech world while savouring every moment of college life. Whether I'm coding, collaborating on projects, or exploring new technologies, I’m all about learning and having fun along the way.

# MY RESUME

| SECTION | DETAILS |
|---|---|
| **Personal Information** | Name: Mekdelawit Andualem<br>Address:Addis Ababa, Ethiopia<br>Phone: +251944704754<br>Email:mekdelawitandualem07@gmail.com |
| **Objective** | Motivated third-year software engineering student seeking opportunities to further develop my technical skills in a collaborative environment while contributing to innovative projects. |
| **Education** | **Bachelor of Science in Software Engineering**<br>*Addis Ababa University*<br>Expected graduation: July 2028 |
| | **High School Diploma**<br>*Nazareth School*<br>Graduated: June 2022 |
| **Extracurricular Activities** | Vice President, ***Rotaract Club*** of Nazareth School |
| **Work Experience** | **Tutor**<br>Self-employed<br>Summer 2024<br>-Provided tutoring in mathematics and science to middle school students. |
| | **Business Outreacher & Virtual Assistant**<br>Freelance<br>January 2023 - Present<br>-Assisted small companies abroad with outreach and customer engagement strategies. |

# SKILLS

## *Programming Skills*

*HTML*

*Java*

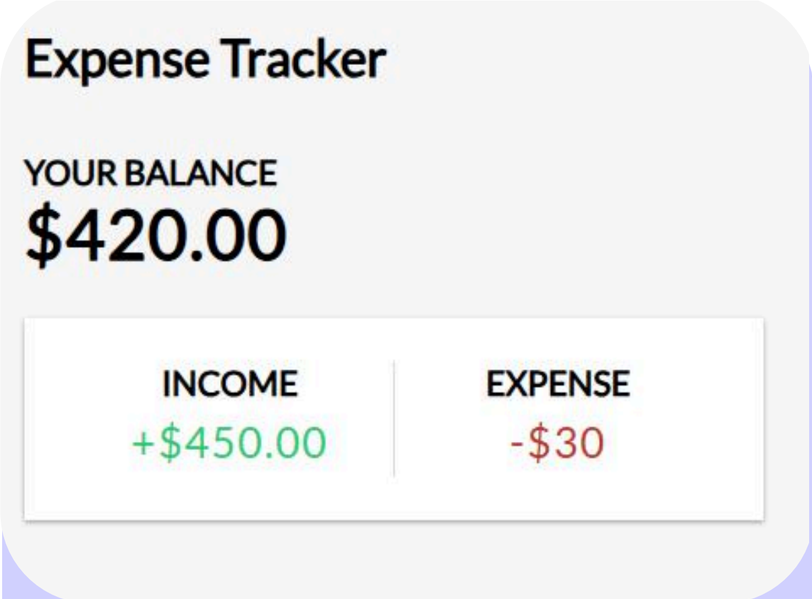
*MySQL*

*Python*

## *Technical Skills*

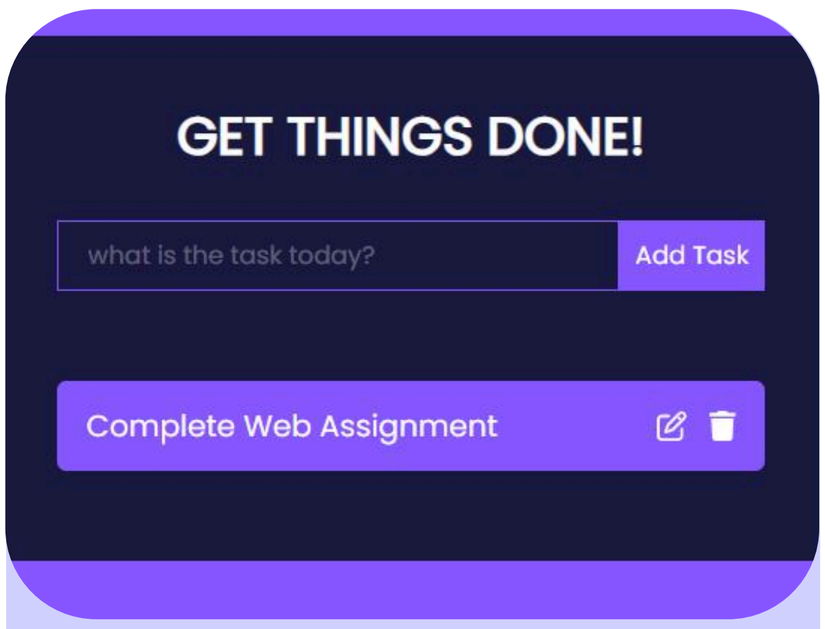
- Collaborative mindset and ability to work cross-functionally.
- Organized and detail-oriented with strong time management skills.

# PROJECTS



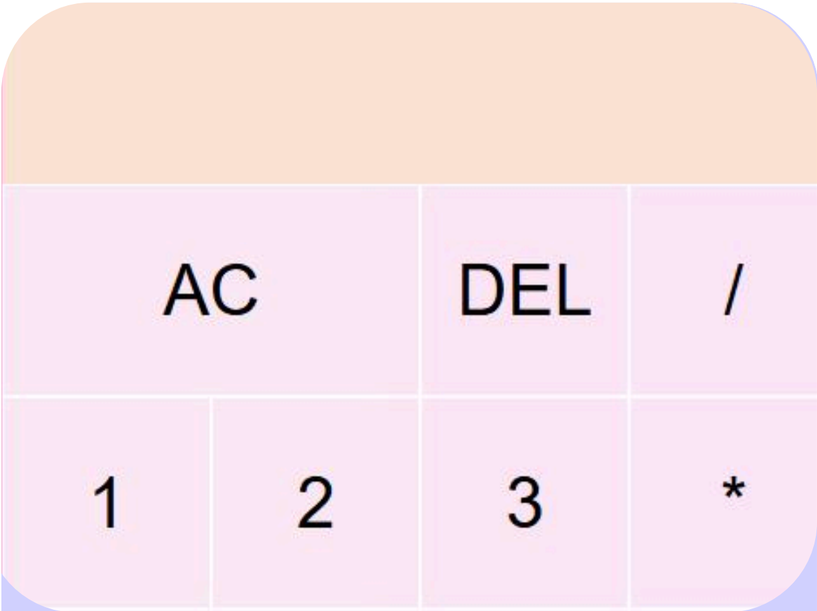
## *Expense Tracker*

*The Expense Tracker is a web application that allows users to add transactions by inputting an item and its price. Once added, each transaction appears in the transactions list along with its respective price. The app automatically calculates and displays the total income, total expenses, and the current balance.*



## *To Do List React Project*

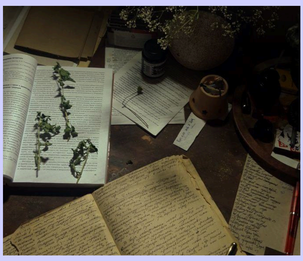
*This is a simple To Do List application built with React. The application allows users to add, edit, and delete tasks efficiently.*



## *Calculator React Project*

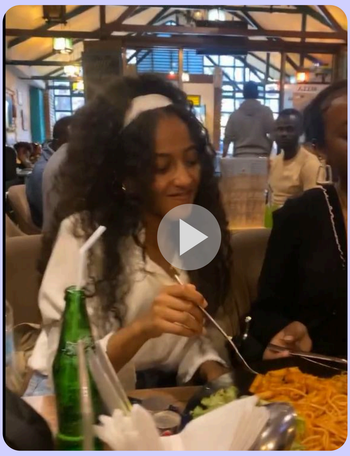
*A simple and interactive calculator built with React. This project demonstrates the use of React components, hooks (specifically useReducer), and CSS for styling.*

# MY HOBBY



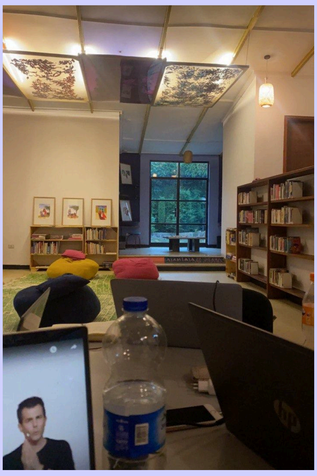
### *Poetry*

Poetry is my creative playground! I revel in the dance of words, using them to express my thoughts and emotions. I also love immersing myself in poems that resonate deeply, letting their rhythms and meanings wash over me. Each verse is a new adventure, a delightful exploration of feelings and ideas!
I would like to share one of my recent poetic creations with you.



### *Gathering With Friends*

Spending quality time with my friends is another one of my favourite pastimes! Whether we're wandering around campus, exploring new restaurants, or diving into exciting events, time simply flies by without us even noticing. Each moment is filled with laughter and adventure, making every outing a cherished memory!

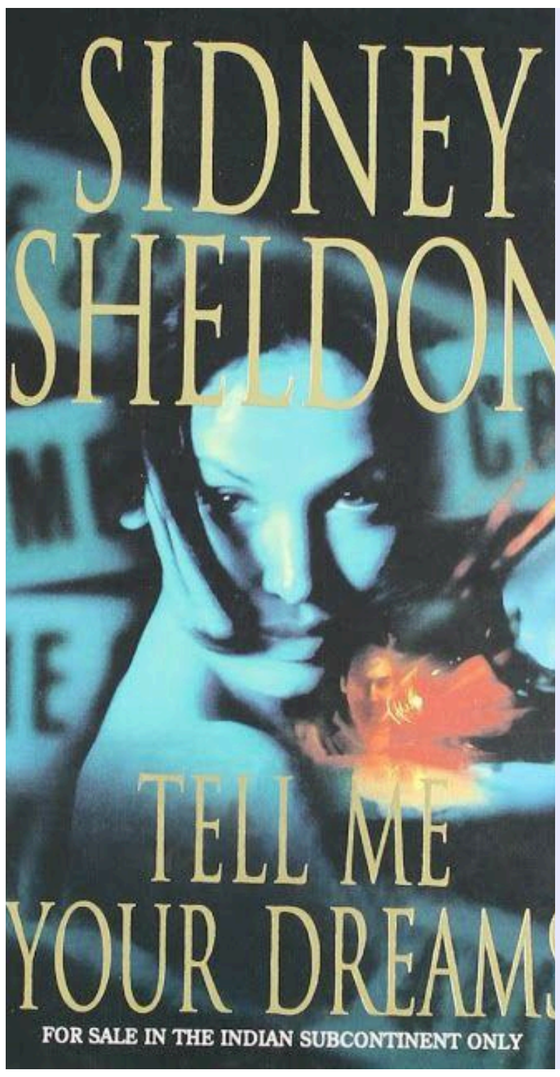


### *Coding*

It's been a few years since I embarked on my journey as a software engineering student, and since then, my favorite activity has been sitting in cozy, quiet 'work from home' cafes and coding away!

# My Book Shelf

**'A reader lives a thousand lives before he dies!'**

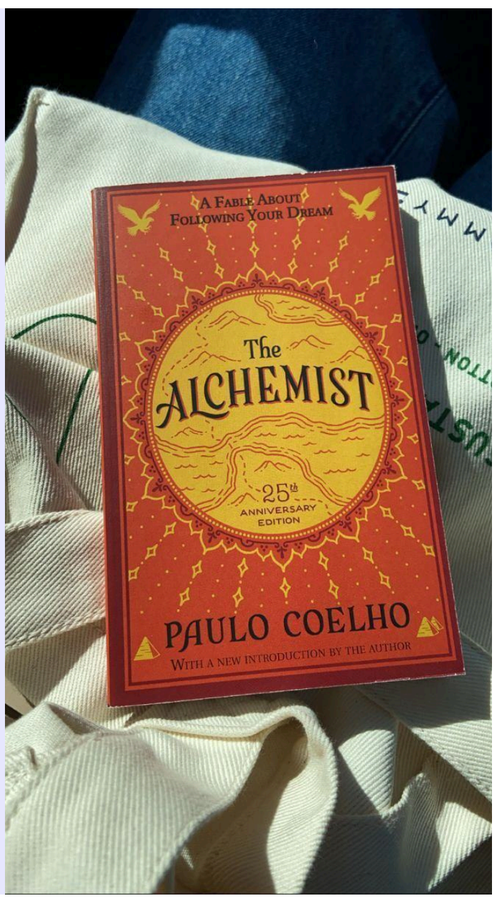


*'Tell Me Your Dreams is one of my favourite novels from Sidney Sheldon's collection. The story follows a young woman grappling with Multiple Personality Disorder, drawing readers into her complex world as she becomes embroiled in a chilling crime scene. Sheldon masterfully sheds light on the challenges of mental health, raising awareness about the disorder in an engaging way. It's an astonishing piece that combines suspense and depth, making it a compelling read!'*

*'As an individual who struggles with decision-making and often contemplates what lies on the other side of choices, I found this book to be almost liberating. The protagonist is caught between two significant life decisions and ultimately chooses the path that costs her one of the greatest opportunities of her life. Living with her regrets, she gains a glimpse into what her alternate decision could have entailed by slipping into a parallel universe. The narrative beautifully explores the themes of fate and the idea that our choices, rather than being mistakes, offer us a different set of experiences.'*

*'Guided by omens and a mystical mentor, Santiago encounters love, destiny, and the pursuit of one's dreams. This enchanting novel explores the universal themes of self-discovery, purpose, and the interconnectedness of life.'*

*Here's an introduction from the audiobook of The Alchemist:*



*'This book resonates with the saying, "Our childhood can lead us to walk down paths blind to red flags, as we seek the familiarity of what we grew up with and label it as love." I'll leave it at that! Enjoy!'*
